

# Soul Connection Consultations

Everything we have done in our life, the courses and training we have taken have all guided us on our spiritual path and brought us to where we are today. Now it is time to be further awakened.

Soul Connection can help you be more open to yourself; to evolve as an individual and open your own soul gifts. It is about becoming enlightened, being more conscious of everyday choices in life, functioning at a higher vibratory level – through love instead of fear.

## If you:

- ◆ Have done plenty of emotional release work in the form of EFT, NLP or TFT etc.
- ◆ Have experienced past life regression and hypnosis
- ◆ Are still struggling with the same issues and are unable to resolve them
- ◆ Are ready to delve deeper into the truth of who you are & work co-creatively with your soul
- ◆ Are open to embracing all aspects of your Self, so that you can create your desires
- ◆ Want to co-create from your Heart not your ego or purely from intellect
- ◆ Are looking for ***something more...***

Then it is time to experience Soul Connection Consultations. Recently developed by Michelle Hardwick (pictured below) of Release...Peace, Soul Connection combines deep relaxation (Hypnosis) and profound, channelled questions. We also utilize a form of light healing to balance the whole body, ensuring you are more fully connected to your intuition, your soul and the truth of who you are, at all times.

Together we gain wisdom and truth from your soul to help you evolve further or resolve residual challenges still on-going in your life. Some remaining issues are symptoms "of the soul," i.e. they are issues relating to the fundamental aspects of who you are as person and as a spiritual being.

If you would like to discover the answers to who you really are and more about yourself; uncover your own path for your spiritual growth and development; to know why you are here and what your purpose is; to connect to your soul, intuition and be more true to yourself, then Soul Connection can help you to achieve this.

**Deepak Chopra** explains:

*"You can't change the body without changing the self,  
and you can't change the self without bringing in the soul.  
"It's all one process, and it begins with knowing that your  
body exists to mirror who you are and who you want to be."*
